

Urinary Tract Infections

EVIDENCE REPOSITORIES

Evidence repositories are collections of best available resources and evidence (clinical guidelines, peer reviewed literature, systematic reviews, etc.), collated by our knowledge synthesis team and content advisors. This evidence repository is not intended to be an exhaustive list of resources for a topic, but rather a curated list of current, evidence-based resources, based on expert consensus of relevance and usability for a general emergency department setting. We search databases (Cochrane Library, PubMed, TRIP Database) and web search engines (Google, Google Scholar) to locate evidence. Additionally, hospital websites are browsed for guidance documents, such as clinical practice guidelines (CPG) for healthcare professionals

Every effort is made to identify resources that are open access (i.e. publicly available, free of charge, not requiring a subscription).

More information about the creation of our evidence repositories can be found at

<https://pubmed.ncbi.nlm.nih.gov/28537762/>

CONTENT TEAM

Thank you to the following content experts and Knowledge Synthesis team who led the development of this evidence repository

Dr. Gina Neto

Clinical Investigator, CHEO Research Institute

Assistant Professor, Department of Pediatrics; Associate Chief, Division of Emergency Medicine, Children's Hospital of Eastern Ontario (CHEO)

Dr. Nicole LeSaux

Clinical Investigator, CHEO Research Institute

Physician, Division of Infectious Disease, CHEO; Associate Professor, Department of Pediatrics, Faculty of Medicine, University of Ottawa

Liza Bialy

Knowledge Synthesis Project Coordinator, Alberta Research Centre for Health Evidence,

Department of Pediatrics,

University of Alberta,

Edmonton, AB, Canada

Urinary Tract Infections
