EVIDENCE REPOSITORIES

Evidence repositories are collections of best available resources and evidence (clinical guidelines, peer reviewed literature, systematic reviews, etc.), collated by our knowledge synthesis team and content advisors. This evidence repository is not intended to be an exhaustive list of resources for a topic, but rather a curated list of current, evidence-based resources, based on expert consensus of relevance and usability for a general emergency department setting. We search databases (Cochrane Library, PubMed, TRIP Database) and web search engines (Google, Google Scholar) to locate evidence. Additionally, hospital websites are browsed for guidance documents, such as clinical practice guidelines (CPG) for healthcare professionals.

Every effort is made to identify resources that are open access (i.e. publicly available, free of charge, not requiring a subscription).

More information about the creation of our evidence repositories can be found at <https://pubmed.ncbi.nlm.nih.gov/28537762/>

CONTENT TEAM

Thank you to the following content experts and Knowledge Synthesis team who led the development of this evidence repository.

Graham Thompson, MD, FRCPC

Assistant Professor, Department of Paediatrics, Alberta Children's Hospital Research Institute
University of Calgary, Faculty of Medicine

Mona Jabbour, MD, FRCPC

Chief of the Department of Pediatrics, Children's Hospital of Eastern Ontario
Associate Professor in the Department of Pediatrics, University of Ottawa

TREKK developed resources for healthcare providers and parents & families can be found [here](#).

Clinical Guidelines

1. Jefferies AL. [Management of term infants at increased risk for early-onset bacterial sepsis](#). Paediatr Child Health. 2017;22(4):223-8.
2. Kissoon N, Orr RA, Carcillo JA. [Updated American college of critical care medicine--pediatric advanced life support guidelines for management of pediatric and neonatal septic shock: Relevance to the emergency care clinician](#). Pediatr Emerg Care. 2010;26(11):867-9.

Systematic Reviews

1. Wacker C, Prkno A, Brunkhorst FM, Schlattmann P. [Procalcitonin as a diagnostic marker for sepsis: A systematic review and meta-analysis](#). Lancet Infect Dis. 2013;13(5):426-35.
2. Alejandria MM, Lansang MA, Dans LF, Mantaring JB, 3rd. [Intravenous immunoglobulin for treating sepsis, severe sepsis and septic shock](#). Cochrane Database Syst Rev. 2013;2013(9):Cd001090.
3. Yo CH, Hsieh PS, Lee SH, et al. [Comparison of the test characteristics of procalcitonin to c-reactive protein and leukocytosis for the detection of serious bacterial infections in children presenting with fever without source: A systematic review and meta-analysis](#). Ann Emerg Med. 2012;60(5):591-600.
4. Martí-Carvajal AJ, Solà I, Gluud C, et al. [Human recombinant protein c for severe sepsis and septic shock in adult and paediatric patients](#). Cochrane Database Syst Rev. 2012;12(12):Cd004388.
